
SPEED

Posted by gplant - 2008/06/24 07:35

What kind of speed does the Talisman bows get?? What are the poundage range they come in?Im sure I could look to find this info but thought it would be a good post for enquiring minds that want to know;) I got to say it again,They are the coolest looking bows I have ever seen!!!!:woohoo:

=====

Re:SPEED

Posted by Phil Abrahams - 2008/06/24 10:38

Hi there, the Mantis bow is shooting a 400 grn at 600 fps with a draw weight of 235lbs and powerstroke of 14 inches with a 600 grn solid alloy bolt it is doing over 500 fps and sends a bolt straight through 9 layers of thick carpet and hardwood of half inch with ease.I shot targets at 200 yrds with no problem with a 600 grn bolt and boy its there as soon as the trigger is squeezed.It will shoot accurately out to 250-300 yrds with a 400 grn bolt.All this power and its as quiet as a handbow.The other bows i make like the Demon and Dark angel shoot at speeds of 350 plus to a max of 385 fps with bolts of 350-400 grn.The very high speeds are achieved by using a one piece specially constructed unbreakable special high speed alloy prod.A one piece prod is much better than bolt on limbs for speed.Bolt on limbs waste a lot of space as the centre part is doing nothing also you can make a narrower bow with a higher speed than a wider bolt on limbs bow.I am developing a brand new ultra high speed flexing recurve bow that will exceed 400 fps.Its my next assignment after the bullet shooting attachment,If you would like to know anything else at all just let me know,Thank's,Phil.

=====

Re:SPEED

Posted by Phil Abrahams - 2008/06/24 10:51

P.S the draw weight on the demon is 190 lbs at 10"powerstroke and the Dark angel is 220 lbs at 9" powerstroke.These two crossbows are very fast and very accurate.We shoot targets to 100 yrds with these no problem.With a Telesight on the Dark Angel bow i hit a meatfly at 30 yrd's with my own handmade carbon 2 fletch 350 grn bolts,Phil.

Re:SPEED

Posted by Phil Abrahams - 2008/06/25 01:26

Greg i myself is still finding it hard to believe what this crossbow can do,i have to pinch myself after i shoot it as its like a crazy magical dream,The accessories that i have just completed working on will make it a dream to use.And although it is very very safe to load as i have loaded it with leather gloves on,on numerouse occasion's and i also ensure that i load the bolt without getting my finger's in the way of the string. I am not taking any chances with anyones fingers.So i have designed a special bolt loading tool for absolute safety and this work's excellent.As no one feels safe on railway lines even though a train might never be coming.With incredibly high speed's as these it would be absolutely crazy to get ones finger's in the way of the string and under no circumstances no one ever should,the string is hitting around 800 fps on dryfire with ease.And this bow copes with it with ease on a dryfire, the accessories will make this bow a real ultra safe pleasure for everyone to shoot it,just the way it should be,Phil.

=====

Re:SPEED

Posted by marcusjb - 2008/07/01 07:32

How is the bow able to reach 600 fps? What unique features does it have to attain that speed?

=====

Re:SPEED

Posted by Phil Abrahams - 2008/07/01 09:08

The very latest accessorie i am working of now was an idea i had two day's ago and it is already being made to test shoot bullets to high speed hopefully in a day or two as i have managed to work thing's out it will allow you to shoot bolt's and bullets and will be ready to fire these in a minute or two and vise versa back to shooting bolt's.This will give the shooter more options in the field or target range ,it's all good fun,Phil.

=====

Re:SPEED

Posted by Phil Abrahams - 2008/07/02 06:02

Marcus jb,The bow reaches these incredibly high speed's through pricise gearing ratio's and very high energy storage,coupled to precission lightening and balancing of component's and then tuning these component's to get the very best performance possible from each and every one.Lot's and lot's of mathematicle calculation's to work out the energy maximum transfer to the pivoting limb's and allowing for mechanical losses and then compensating for each loss. It would be very difficult if not impossible to store such high energy level's using a coventional bow system,Thank's Marcus jb for the interest, i hope this is of help,Phil.

Re:SPEED

Posted by Phil Abrahams - 2008/07/04 08:09

I shot an empty large propane gas cylinder last night the ones you find on mobile homes, at my friend's yard,he said no way will a crossbow peirce that as a 22 live round wont touch it they are very tough thing's around 3 to 4 mm thick toughened steel.So we set it at 100 yrd's for safety ,just in case there was some gas in there and i shot it with a terminator toughened steel bolt at this range and it stuck straight through one side.My friend Steve and his boy Ricky could not believe this so we shot it several more times and one of the bolts hit on the curved top of the cylinder and still went clean through,it was awesome fun.They were blown clean away by what this awsome crossbow could do,i then fitted the bullet rail and hit it several times denting it severely, one of the rounds ricocheted of in a hail of spark's and took a 4" dia branch clean off a tree 50 yrd's away it was wicked.We then shot a car and it went clean through both sides and stuck into a tree.

Re:SPEED

Posted by WallyD - 2008/07/04 08:47

Did you use the Mantis, or the Beast for that test?

Which ever one it was ... all I can say is "AWESOME"

:)

Re:SPEED

Posted by Phil Abrahams - 2008/07/04 10:50

It was the mantis ,the beast will do a cylinder as well with 4 or 5 mm dia terminators.The mantis did this with 5mm dia terminator bolt's.The beast is incredibly powerful as well but the mantis is a lot more powerful.I can cock the beast by hand drawing at 225 lbs and it is a big fun bow that would go clean through an elephant with ease at well over 150 yrd's.

Thats Incedible!!!!!! Have you figured the KE that it puts out?

Re:SPEED

Posted by Phil Abrahams - 2008/07/07 07:47

Yes G Plant it's 400 ft lbs of kinetic energy,i know it is amazing power.And so safe to use as well it dont even feel remotely dangerouse beacause it is over engineered and able to cope easily with all this awesome power,Phil.

Re:SPEED

Posted by gplant - 2008/07/07 08:13

Thanks Phil! Like I said thats just incredible!!!!!!Do you have any pics?

Greg

Re:SPEED

Posted by Phil Abrahams - 2008/07/18 11:01

When Ivan comes back from his hunting trip in the brazillian rainforest's i will upload some incredible pictures of very seriouse impact damage.On the talisman video there is a pipe with a dent in it.The target tip dissintegrated on impct with the pipe,with one incredibly loud ching:silly: it was awesome, totally wild {i nearly wet myself where i was laughing so much}.if you look at the two bolt's pictured with the pipe you will see one with the tip's completely gone,that is one very severe impact.I also shot this same 5 mm thick steel pipe which is from a lampost at 50 yrd's and the terminator bolt went

clean through one side with a another very loud ching:silly: .I will show you all this incredible stuff very soon,dont you worry,i am still doing lot's of different test's with this monster,boy it's fun,i love it.Well it's been a lot of very hard tiring work and some fun here is more than welcome.Ps anybody got any old telly's or microwave ovens they dont want,only joking,Phil.:silly:

=====

Re:SPEED

Re:SPEED

Posted by Phil Abrahams - 2008/07/24 05:05

BULLET'S UNDER EXTENSIVE TESTING,wow now this has been a huge monumental success.I am so much more than ecstatic to tell you what has been achieved with the bullet system,following a grounbreaking brand new STATE OF THE ART flightless design which to my knowledge has never been done before.This new breed of bullet gives superior range with very good accuracy way beyond 200 yrd's and with more than enough kinetic energy on board for an outright kill.I was totally amazed to see cloud's of dust flying up after striking huge rock's in a hail of spark's ricochetting off at very high speed's you could hear a few of them howl and the noise from the impact was very loud at 200 yrd's.I was overshooting these rock's at 200 yrd's with ease and had to lower the trajectory by a good 50 yrd's to get hit's.On close inspection of the impact point's on these very hard granite rock's there was huge gouges and big chunk's that had been taken clean out of these rock's with huge white impact mark's,man it was just too awesome for word's.I am now working flat out on the bullet track to fit a rifle type bullet loader with a breach bolt.This system will enable shooter's to use much more cost effective ammunition in their MANTIS for outstanding performance and wicked fun.To say i am very excited about this is an understatement.Boy you guy's n gals out there are really in for some seriouse fun now you can be sure of this,THESE AWESOME BULLET'S ARE TOP SECRET AS TO THE DESIGN,SHAPE,WEIGHT,LENGTH, DIAMETER AND MATERIAL'S until patent's are secured,This is ultra cool stuff trust me,Phil.

=====

Re:SPEED

Posted by gplant - 2008/07/24 05:36

Phil, You amaze me with the stuff you come up with!!! I cant wait to see this. Did you get any speed readings?

=====

Re:SPEED

Posted by Phil Abrahams - 2008/07/25 01:12

Thank's Greg,i know for a fact that it is hitting velocitie's around 650 fps with ease,i tried two different weight's of bullet of 250 grn and 300 grn and the 250 grn is easily hitting way over 600 fps with ease and the 300 grn is hitting above 600 also,i am sure of this through many year's of research and development with very high velocity spring air weapon's topping 1,200 fps.When i get to America we will be doing all the test's on an official level with the very best and most accurate scientific apparatus for all to see,i got no worries whatsoever here about performance,i know my stuff when it

comes to all this,and you could say that i am a little bit excited to say the least.CANT WAIT TO BRING THIS AWESOME
PIECE OF KIT WITH ALL THE ACCESSORIE'S OVER THERE TO SHOW YA ALL.You can all have a shoot with this
bad boy crossbow,Dont worry ill be there very soon,Phil.B)

=====

Re:SPEED

Posted by WallyD - 2008/07/25 03:03

We are all just as excited as you are about this state of the art masterpiece, too ... and I am sure I speak for all of us
when I say we are looking forward with excitement to the day you move to the USA.

=====

Re:SPEED

Posted by Phil Abrahams - 2008/07/25 05:32

Cant wait to be there,i want to be there right now.This incredible bow has just undergone one complete strip down
following an ultra high performance tune up,and any component's showing any sign's of wear and tear under these
incredibly high power stress level's have been fully uprated for 100% reliability and safety.I have some work to do now to
make the final adjustment's to the high speed bullet rail to make it more of a shooting pleasure and have arrived at the
perfect solution for all this to happen.Just a few more day's now and i am ready to go,as everything is now just perfect
with this incredible bow and i am at last completely satisfied with everything it doe's.BOY JUST CANT WAIT TO SHOW
YA ALL THIS INCREDIBLE STUFF IT DOE'S.I am finalising flight arrangement's with Ed as of now so i can be there just
as soon as i can,trust me i am getting everything geared up for all this as i speak.I just want to say a very big thank's to
all you crossbow lover's out there all over the world B) ,peace and love to ya all,Phil.

=====

Re:SPEED

Posted by Phil Abrahams - 2008/07/29 13:01

Just thought i'd let everyone know that the bullet rail is coming on brilliantly,i have made a few slight alteration's in order
to get everything to work just perfect.It is nearly ready to be assembled and adjusted for perfect bullet clearance in the
stainless steel barrel.I'll be shooting it in a day or two and cant wait to fit this incredible accessory to the MANTIS
PROTOTYPE with all the trimmins,hell it's gonna rock with the awesome breach bolt rifle type bullet seater,plus i got
some other design's of bullet to try in it as well.I am going to try some 150 grn alloy bullet's on lower power for very high
speed target work plus some heavy cal for the awesome super high power level,Phil.

=====

Re:SPEED

Posted by Phil Abrahams - 2008/08/05 14:03

BULLET RAIL IS COMPLETE and boy it's a bad ass bit of kit,after testing and adjusting for accuracy i have tried it out at
30 yrd's with huge success.Set on lower power the mantis shoot's a special 150 grn bullet at around 500 plus and it is
also as accureate as a german air rifle at this range.I am now waiting on the endless rain to stop in this wonderful country
before i can complete more longer range testing,it look's like our summer has abandoded us as well as all the other
good stuff so far,maybe sometime this year we may have a nice day,who know's miracles have happened as of now it's
all down to the good old british weather again,just like the good old everything else here:(:(.

=====

Re:SPEED

Posted by gplant - 2008/08/06 05:26

So whats next? Im sure you got something else going on. You know we need to come up with a target that will stop bolts
at the speed the Mantis can deliver and market that.
Greg

=====

Re:SPEED

Posted by Phil Abrahams - 2008/08/06 07:19

Very good idea Greg we sure need target's that can safely stop the bolt's without any damage to them on high power. And i have made target's that can do this and it will work with broadhead's as well, Well keep the plan for these very special target's our secret as it will be a very good accessory to the rapidly growing Talisman range, and it will not be expensive either. I for one would not want to shoot at a target that break's the bank. Also i have more test's to complete on special bolt's that will hold their downrange energy better than conventional bolt's. Now these are amazing stuff and i am nearly there with them ,not long now just a few more fine adjustment's for perfection. These new design long range hunting and target bolt's will spin in flight and will also be cheaper to produce and therefore cheaper for the shooter. It's getting very hot here now. I am always thinking of new way's to make the crossbow even more versatile and better soon well be beating gun's he he. Hey what am i on about i already have beat a 22 long rifle with ease here at 400 ft lbs and most hand guns as well. The velocitie's on high power with 200 grn bullet's is incredibly fast, at 200 yrd's it's there in a second just like a rifle. Crossbows rule, crossbows forever and ever, guess you could say i like crossbows just a tad, he he.

=====

Re:SPEED

Posted by WallyD - 2008/08/06 07:57

A target that will handle the Mantis will be no problem for me to design, once I actually have one in my hands to use for testing what I design. I am sort of an expert at targets and backstops. I design and build them to stop all types and speeds of missiles that are fired from weapons such as air rifles, firearms, and archery. Some of the Bartow, FL police officers have seen and been highly impressed with some of my ideas. One of the area captains even approved of one of my air rifle targets that I was using in my yard. However the home owner' association (Real Estate Gestapo) determined I am a nuisance. LOL.

=====

Re:SPEED

Posted by gplant - 2008/08/06 08:31

We'll need something that can stop a bolt at 600fps and still be able to pull it out by hand. I'll put the thinking cap on. We work with all kinds of mat that may just be the trick. Wally, See what you can think of and I'll start checking things out at my end. Together we should be able to come up with a good one that is affordable.

=====

Re:SPEED

Posted by Phil Abrahams - 2008/08/06 13:43

Nice one guy's, i think that all idea's here should be kept our secret so please pm me with any idea's and we will all work together on this. I'll tell you what i have done myself and it is very good and the bolt's come out easy enough.

=====

Re:SPEED

Posted by Phil Abrahams - 2008/08/11 09:14

After arduouse and very intensive testing with bullet's of varying weight's i have been able to shoot a bullet clean through a piece of 30 mm pine at 30 yrd's. I have also been experimenting with variouse bullet tips a semi wadcutter in steel blows a nice hole and blows the back right out splinter's everywhere i will get some of these amazing impact pictures to put on the site. I know it will penetrate a piece of 40 mm pine and maybe a 50mm piece with the correct weight of bullet and i am going to do a lot more test's as well and i'll get all the pictures onto the site ;). It is incredible stuff.

=====

Re:SPEED

Posted by Phil Abrahams - 2008/08/14 15:01

Just spoke with Ed,he's been out getting BIG BUCK'S and everything is fine.It wont be too long now before everything is organised for me to come over and get this xbow into production,as of now everything is just PERFECT and ready to go go go,boy cant wait he he we are all going to ROCK the CROSSBOW WORLD BIG TIME HE HE,JUST CANT WAIT TO SEE THEM FACES when they see it go,or shall i say cant see it go it's way tooooo faaaaast to see,ther is no way you will see a 400 grn bolt go with this it is just wild.:ohmy:Looks like ROGER RAGLIN will be one of the first to see this MONSTEROUSE CROSSBOW DO IT'S STUFF he he he'll love it,cant wait to hook up with you ROGER and see THE WALL in the FLESH.:woohoo:

Sounds like fun Phil!!! Im getting pretty excited about all this!(can ya tell)
Im really looking forward when we all meet. It will be a blast!!
Greg

=====

Re:SPEED

Posted by Phil Abrahams - 2008/08/15 15:25

Greg,all this great stuff happening right now is what keep's me going.I dont know what i would do if it was'nt for all this :side:.I am so looking forward to meeting you,Ed,Ivan,Wally D and Dave2 and everyone else as well.It will certainly be one hell of a BLAST!!!! you got no worries there at all.I would like to take this opportunity to appologise for the way i have been feeling about the UK,also at this very moment my wifed dear angel of a mother who we all love so so much is in the St Peter's Hospital for terminally ill cancer patient's and it is very difficult times here at this moment.I am a good person,so ive been told,and when i speak about all the outrageouse antic's of what is going on here in the UK i speak for many i am sure,and everyone has problem's of one sort of another whoever they are and wherever they are.My trouble is i get very angry when i see all this unfairness happening as i like to see all people treated fairly and in this day and age i would simply not expect nothing less.I dont mind immigrant's coming here to live one bit,as my stepfather was a good Polish man and a wonderful father after my Father died on his motorcycle just before i was born.It is the totally obscene and outrageouse number's of these people that are allowed to all come and live on this tiny island.There is more of them than us here now and all our heritage going back not hundred's but thousand's of year's is at stake now.I dont mind

helping other's one bit but this is taking the piss right out of the REAL BRITISH PEOPLE, and it is simply not good enough. Our roads are a complete nightmare our hospital's are germ factories and everything here now is quite simply F****D and to top it all we are the highest TAXED in the world with nothing to show for it. They give these immigrant's houses, cars, fuel, food, heating and everything else vouchers, and money to send to their families back home, while we can't even afford to drive our cars because we pay £8.00 out of every £10.00 worth of fuel and that is gone through the roof as well. IT IS ONE HELL OF A PISS TAKE HERE HAVING TO STOMACH ALL THIS NOW. I paid tax all my life and now have F.A to show for all this wasted money that I had to scrimp and scrape on just to get by here. I am telling you all this here, because I want you all to know THE REAL ENGLAND NOW. A good friend of mine who fought in the Cossovan War and the middle east, has lost his job and was jailed, simply because he called some shit a black bastard, so what, if they call us a white bastard do they get shit like this hell no. It's as simple as this if your white and a bastard then call them one if they are black and a bastard, you ain't gonna call em a white bastard are you. Everything here is racist now even our nursery rhymes, they will label you a racist here now if you look at someone the wrong way as long as you are white they will do you here, it is f***** SAD and so f**** UP it's unreal I want to become a racist now myself because of all this braindead shit here. And so do many others. They don't even know what racism is till I tell them and my totally wild friend's from the SAS and many others start, trust me. They ain't got no idea in their wildest dreams what could come their way if we really got pissed off here, so far so good, for their sakes I hope it don't come to this. But there's a hell of a lot of ticking bombs over here now just waiting to go off and they will very soon if this braindead shit carries on. And it won't be just white people either there are a lot of African, Jamaicans and many others here who all feel like me as well now as they have been shit on here as well.

=====

Re:SPEED

Posted by Phil Abrahams - 2008/08/16 04:43

Anyway I can't do anything to put this mess right here and neither can no one else now. I hope in my heart that no one ends up getting hurt here as it is not their fault, but anyway On a much more brighter note :) I have been working overtime and have made a bullet clip and accessory storing part that clips onto the crossbow and it is wicked B). I will take some pictures and get Ivan to put it in the gallery, plus some awesome impact shots on wood and a piece of 5mm steel pipe with a bolt stuck clean through one side, you boys are gonna love all this :ohmy:. I have had to abandon the hunting trip because of my mother in law's ill health and the weather ain't too good here either :(Don't worry I will be going hunting HERE with the MANTIS when I can and I am going to get me a deer for the table :P. The wound channel with a semi wadcutter will be awesome and better than any broadhead out there :ohmy:. It will take a deer out very clean with head or a heart and lung shot and foxes too, no worries there. I want to do this and post the pics of the awesome bullets in action on game. It will make a small entry wound and blow a big hole out the exit and blood loss will be very rapid for a very humane kill. Being hit by a 400 grn flightless steel cored bullet doing 600 fps plus will be just like being hit by an INTERCITY 125 high speed train doing 140 :evil: mpm, man them trains are the sickest in the world CHECK OUT THE V 12 PAXMAN VALENTA DIESEL ENGINE MAN baddest sounding engine ever THEY ARE JUST TOO AWESOME FOR WORD'S THE TURBO'S ON THESE SUCKER'S ARE LIKE HUGE :ohmy: AND THEY SOUND LIKE A JET TAKING OFF BOY I WANT ONE SO BAD TO PLAY WITH, I WANT ONE FOR XMAS :) SO I CAN DRIVE ONE LIKE A CAR ON THE ROADS HERE I MEAN RAILWAY LINES. THESE TRAINS CAN HIT 150 mph and more, I did a book on this bad boy train :evil:. It's the antiquated lines in this country that can't handle these speeds not the trains. With the correct gearing it will hit way over 300 mph and with lightened carriages will piss over anything out there with ease as they are 500 ton as of now with eight carriages incl the two power cars. THEM POOR DEER he he it'll be very awesome, can't wait to see the damage. I mean carnage. I conducted an extraordinary penetration test yesterday. I put two pieces of well seasoned pitch pine from old church pews both of 30 mm thickness and put them back to back and shot them at twenty yrd's and the bullet went clean through one and halfway through the one behind it :ohmy: and showed me that it had penetrated 45 mm of well seasoned tough pitch pine with one of these bullets. If I had made it 100 grns heavier it would have done both these pieces of timber and went through 60 mm. I will be trying this next. Now is that powerful enough for you guys. Like I said you can do a headshot on a dinosaur if you can find one, :silly: he he. CHECK IT OUT HERE VERY SOON.

=====

Re:SPEED

Posted by Phil Abrahams - 2008/08/19 12:19

Well as you can all see, this country is one pit. But the crossbows by Talisman are second to none and this is what makes me so proud. All my hard work and patience has seen me through the worst, I made good money here in graphic design, before computers became the be all end all. And just look at TALISMAN CROSSBOWS now. Without computers I have achieved exactly what I set out to do and to show what real skill can do when put up against any other computer designer's on this planet. Everyone world wide can now see what real dedication can achieve when the passion is there and the driving force that makes us all want to do our thing comes together as one.

Re:SPEED

Posted by Phil Abrahams - 2008/08/20 00:51

GUESS WHAT THEM PIC'S I WAS TALKING ABOUT,THEY'RE IN THE GALLERY,FEEL FREE AT YOUR OWN LEISURE.HOPE YOU ENJOY THEM.to see them all click ON MANTIS SLIDE SHOW and you will see the pipe with a bolt clean through one side and the impact damage caused by flying bullet's from the MANTIS.Hope you all like em as much as i did taking them,enjoy folk's.Oh before i forget check out the bullet rail with bolt loader on the Mantis,i love this it's one very bad ass set up,trust.To do this just go to COMMUNITY at the top of the page and GALLERY should come up.You can blow these images up to very large by clicking on them to see it all close up,boy it look's awesome,those wooden pew beam's, the bullet's hit them and nailed em together,i had to struggle to separate them.As you can see the bullet's are a wicked fun thing to shoot with the incredible speed of the Mantis bow and i absolutely love shooting these at rock faces at dusk,you should see the SPARK'S fly it's incredible,cant wait for the weather to change,i need my crossbow bullet fix bad.I also hit a 40 gal oil drum floating on the lake at 100 yrd's,you should hear the impact noise it was loud,the heavier cal's went clean through both side's,man it was wicked fun and i got them bullet's spot on now for accuracy and they are very stable in flight they spin just like a rifle round with my special flighless skirt.And they are so cheap to make i can knock 200 up in a day using basic power tool's no sweat.When we get these into production you will be able to go plinking{funshooting} with your crossbow now just like you do with an airgun.Or indeed varminting or hunting if it's legal there.

=====

Re:SPEED

Posted by gplant - 2008/08/21 10:49

Those pics are sweeeeeet!! The Mantis is one powerful weapon thats for sure!!!!
Cant wait to see what it does to a live shoulder:P

=====

Re:SPEED

Posted by Phil Abrahams - 2008/08/21 13:47

So glad you could get to see em Greg,thank's i love them too.And everyone else too i hope you can check these wicked pic's out,any problem's,just let us know and we are always happy to help if we can.Going back to the awesome hitting

power of the Mantis,well Greg,i dont think that flesh and bone has any possibles against this terrifying power level generated by the ENERGY WAVE technology.What you are all seeing here is something completely brand new in crossbow technology,taking power levels to un imaginable new heights.Them bullet's are deadly as you can all see here,in fact i reckon that a semi wadcutter will do more damage and make a more severe wound channel than a broadhead.We will have to test this all out properly in the USA to determine this,but hey what fun we can have doing this,cant wait.

=====

Re:SPEED

Posted by Dave2 - 2008/08/26 15:12

Phil, sorry about all the troubles your having there, with the foreigners and your mother in law, how is she doing..... The Mantis is just so awesome, the speed is incredible, the damage it can do is remarkable, and it is one heck of a good looking bow for sure....good luck with your problems and hope to see you soon. Have any time frame for arriving and starting production of the Talisman's. Need any help all you have to do is ask. Good luck, Dave

Holy Crap, man put the video on here Phil, can't wait, I can't watch it on my puter with this dial up, but I can watch it at Janet's or my daughters puter, I have got to see this.....

Re:SPEED

Posted by Phil Abrahams - 2008/08/28 03:00

Will do bro,i cant wait to do this,it will be great fun.I will have a good think on what to shoot to make it as interesting as i can,leave it with me,hope it can be done on here.

Re:SPEED

Posted by Phil Abrahams - 2008/08/28 10:52

EXCELLENT NEWS GUY'S.Just spoke to Ivan and YES YES YES it's a gonna be done,well allrighty then i am ON THE CASE,be back soon as i can with THE MANTIS ripping it up and plus the other crossbows as well he he it's gonna be BIG FUN, cant wait,back soon guy's.Im off to get a BIG GAS CYLINDER he he.That's just fer starter's.

Re:SPEED

Posted by gplant - 2008/08/28 12:04

VERY COOL!!!!!! Cant wait to see this!!!!!!

WAIT A SEC,DID YOU SAY GAS CYLINDER?:ohmy:

You be careful Buddy!!!!!!;)

Guy gets to have all the fun:lol:

Re:SPEED

Posted by Phil Abrahams - 2008/08/28 13:15

Dont worry it will be an empty one as i am not going to risk shooting one with gas in it until it can be conducted under the safest condition's,one with gas in it would be insane without proper safety proceedures,is there anything in particular that you guy's would want to see shot with it,i am talking about thing's like old tv,s or other domestic appliances if not i'll do my best to find thing's maybe an old car or something,ill see.I will do different video's on metal, wood,plate glass and in different power level's and horizontal and in verticle.I'll shoot bullet's/bolt's,and do a silent shotgun with it as well,ill do the lot.Hows that.Plus the other bows as well it will make it very interesting for all here.

Re:SPEED

Posted by gplant - 2008/08/29 07:11

Some Hardwood tests with differant style bolts would be cool.

And of course Metal tests just to show the awesome power.

I also would like to see some long range shooting and some reg target shooting.
I would like to get into Comp shooting with one!!!! Cant help it,I love to compete in all shooting sports.

=====

Re:SPEED

Posted by Phil Abrahams - 2008/08/29 13:55

Dont worry i will do all this.

=====

Re:SPEED

Posted by Phil Abrahams - 2008/09/02 01:27

Well we got some videos done already:woohoo: featuring THE AWESOME MANTIS shooting bullets off rock's and at beech trees'and a steel sign and we will upload these onto UTUBE under MANTIS IN ACTION these are just for starters as there will much much more coming soon,CHECK OUT THE AWESOME SPEED GUY'S :evil:.Check out the shot on the kettle,it's one bad mother he he.It's all very ultra coolstuff.I love the ricochettes off the concrete block's them bullet's took big chunk's right out of em in cloud's of dust,TALK ABOUT FAST,THIS THING'S ON FIRE MAN.

=====

Re:SPEED

Posted by gplant - 2008/09/02 12:54

Phil,Can you put a link to the video on here?
Greg

=====

Re:SPEED

Posted by Phil Abrahams - 2008/09/02 14:16

What i will do is upload onto youtube and Ivan will get it all on here.This is just the start of some awesome video's featuring THE MANTIS and all the other crossbows in action on variouse target's.We are composing video images as of now.

=====

Re:SPEED

Posted by Phil Abrahams - 2008/09/05 02:12

As soon as the weather brighten's up i can get out and do more video coverage,but we got some so you can go on with these and i love them they were good fun to make and when you see how fast this thing goe's for how quiet it is, it's major and terrifyingly powerful.

=====

Re:SPEED

Posted by gplant - 2008/09/05 05:56

Phil, Did you send your weather my way?? LOL!! Its been raining every day since Monday.
When will the video be posted? Cant wait to see it!!!!

Greg.We got two video's as of now and i think i may be to upload them directly to Ivan.As i want him to add the logo to the start.You will love these they are just fun,nothing too serious here,but we will make some very serious ones when this wheather clear's up,check out the bullet stuck into a granite cliff face at 100 yrd's and the kettle and the beech tree and more it's all very cool stuff,the metal sign is a good one too,you can hardly hear the bow but the sign on impact with an alloy bolt is LOUD,oh and the ricochette's off concrete block's wow the dust the speed the damage B) B) B).I LOVE it and it was fun making them,Phil.

=====

Re:SPEED

Posted by Phil Abrahams - 2008/09/06 06:38

Sorry Greg for posting by mistake on your post.Yes the weather here has been raining now for month's not week's month's,but anyway we managed to go camping twice and the weather held out for them couple of day's on both occasion's.But now it's back again with a vengeance,talk about rain,it's the wetest summer i can ever remember.i reckon we've had solid rain for 2 month's no joking may'be more it seem's like eternity with no end in sight.Ijust hope it get's better soon for everyone's sake here.I will see if we can upload these wicked video's to Ivan later today,hope i can,if not i will get it to ya all one way or another,no fear me dear's :) i mean dude's.

=====

Re:SPEED

Posted by Phil Abrahams - 2008/09/07 06:11

VIDEO CLIP'S BEING SENT TO IVAN the GREAT {the man that can}TONIGHT I WILL HOOK UP WITH IVAN AND SEND HIM THE CLIP'S,man you will all dig these and cant wait to watch them on here myself,And PLUS a VERY BIG PLUS.WE ARE GOING INTO PRODUCTION VERY SOON,SO ALL YOU GUY'S OUT THERE WILL HAVE A MEAN BOW LIKE THIS TOO,JUST SPOKE TO ED the TALISMAN EXECUTIVE in OHIO and it's all GO GO GO.I am flying out within a week or two at most and i am very excited and very happy to know this now.LET'S BRING IT ON I SAY.THE TORSION ENERGYWAVE BOW SYSTEM IS COMING TO YA ALL.FLEXING LIMB'S ARE GOOD BUT THIS IS SOMETHING ELSE ;)

=====

Re:SPEED

Posted by admin - 2008/09/09 18:54

Dear Phil, excuse me, my internet connection was down. If you can send me the videos to ivantakahashi@gmail.com or it is too big, load up the videos to youtube.

thanksssss and again excuse me.
I am going to connect to the messenger tomorow early

Ivan

=====

Re:SPEED

Posted by Phil Abrahams - 2008/09/10 00:49

Dont worry we will get them to you today my good friend.I have been engraving the Talisman logo on the Mantis bow by hand and it look's cool,plus some graphic's as well to try and create some wicked classy graphics that we can incorporate into the final product givving it even more presence.You will soon be going hunting in PERU with the first Mantis off the line after we test her thoroughly and ensure that she deliver's just the way we want her to,and with the complete kit,case and caboodle.Hook up online with you later,Phil.

=====

Re:SPEED

up vwey soon,Phil.

I take it your here Phil, right.....how do you like it down there, having fun all ready, bet you are, will it is coming together pal, your about to break Crossbowing History, in a big way.....super job.....Dave

Re:SPEED

Posted by gplant - 2008/09/19 11:46

I dont think he's here yet. I think he saying he's finishing things up to go.

Re:SPEED

Posted by Phil Abrahams - 2008/09/19 14:01

Sorry Dave i am not there as yet as i need to sort out several thing's before i can come there,dont worry i will be there very shortly and thank's for the kind word's man i got your back.Cant wait to meet you all,boy were gonna PARTY,Phil.

Re:SPEED

Posted by edmcclaskey - 2008/09/19 20:49

Dave we will be in cincinatti ohio,
next weekend for deer hunting email me for information,

you can come see and shoot the mantis in person, ed

edmcclaskey@yahoo.com

Re:SPEED

Posted by Dave2 - 2008/09/20 06:52

Ed, email is headed your way, thanks, Dave

Re:SPEED

Posted by Phil Abrahams - 2008/09/22 06:56

Well i guess i have done my best here for too many year's now and now i have given up all hope of ever doing any good here for my family or indeed myself,i am not saying i am a loser as i have had some good success here with my creativity but there comes a time where you simply got to make desision's in your best interest's as it seems like my talents are just wasted in this country and i like many other's here now feel very betrayed and taken for idiot's here now.They alway's said that some of the best inventor's in the world came from england and maybe they did but there is just no incentive here to motivate many good people as thing's are as tough as they can possibly make them.It just so seem's that everything here is such a complete waste of time energy skills and no way do they encourage people like myself they just put everything good here down like a sick dog,all they seem to want people to invent here is thing's for

computer's or tupperware partie's or dashboard's for ipod cars and that just aint me.I DESIGN CROSSBOWS now that's me and some people think that i am some kind of dangerous maniac because i do this,well i have never hurt nobody ever i like crossbows because to me they are wicked fun and i like dangerous thing's as i find them dead sexy and cool and i like that,Phil:).

=====

Re:SPEED

Posted by gplant - 2008/09/22 07:15

Dont hold back your feelings Phil LMAO!!!! We will be HAPPY to have you and your famliy here Bro!!!!!!!
BEST COUNTRY EVER!!!!!!!!!!:woohoo:

=====

Re:SPEED

Posted by Phil Abrahams - 2008/09/22 07:48

Dont worry i will take my talent's and skill's to AMERICA where thing's like this are appreciated and just do everything to my highest ability for everyones pleasure not just mine but everyone elses too :).And i know we are going to be very successful doing all this as i know that the best people i have met are here with me on this giving there 150 percent too and we also have a very cool product some say the coolest not all but some so hey let's go and get this done now,Phil.

=====

Re:SPEED

Posted by Phil Abrahams - 2008/09/22 08:00

I was always told that this country owes me nothing well it owes all the foreigner's houses,car,s and all the money they need to outbreed us but not people like me no only them,man and they say DONT BE A RACISTas it just is not very nice we must welcome them here to take our job's houses etc with open arm's. I say i am not a racist my government is, against me and my people THE GOVERNMENT of this disgusting pit are the RACIST'S,against their own flesh and blood that's how it is here now.All they are doing is driving good skilled british people out now to make way for all them inbreed thing's that payed no tax fought no wars just parasites is what they all are dragging this once great place down day by day :(I guess that's about right in today's wonderful modern world.WHO THE HELL NEED'S A WORLD LIKE THIS,NOT ME:(.

=====

Re:SPEED

They do the same thing here. Foreigners can get the money to start a business much easier then I could.I dont understand why or how this works but thats the way it is.

=====

Re:SPEED

Posted by Phil Abrahams - 2008/09/22 10:39

It's all wrong:(,and no way should anything like this ever happen but unfortunately it doe's.Government's are all twisted and only cause bad vibes by doing this,i always thought they were supposed to be very intelligent people but it is so obvious that they are all dumb everywhere in every country if any of them had brains they would be dangerous,and then

they want us to put our lives on the line to fight war's for what.And then this is how they thank us with shit like this.No one should fight any war's for no government's it should be the government's killing each other with gun's and not their abused innocent people that they think nothing of,and then come election time they spill out all their lies AGAIN just like they did so many times before to get our votes so they can line their pockets again at our sad expence.

=====

Re:SPEED

Posted by Phil Abrahams - 2008/09/22 10:49

I believe that all politician's are the devil's children as they are all so evil,Phil.Saying that just maybe a few good men out there are polititian's as well,i hope.

=====

AMEN!!!!

=====

Re:SPEED

Posted by Phil Abrahams - 2008/09/22 14:20

Anyway as you can probably guess i am very stressed out here again.I managed to drop a tiny screw into the trigger mechanism on friday and have had to strip the butt end part down to get it out after trying without success for several hours and while doing so an allen headed bolt rounded off and i ended up doing a major job for the last two day's.If it can go wrong then boy it will do at the worst possible time,PHEW so now i got a lot more work than i need to do now,in between making string's and other stuff to organise. Dont worry i will not let this beat me but it is a total nightmare trying to get thing's just the way i want them,sorry for sounding very pissed off here as it's just one of them thing's,Phil.

=====

Re:SPEED

Posted by Phil Abrahams - 2008/09/23 11:19

WE ARE BACK IN BUSSINESS,got it sorted and it is even better than before now as i made a few very slight adjustment's following bedding in and BOY SHE'S RIGHT ON TIME so now we are ready to ROCK AND ROLL,see you all very soon GREG DAVE WALLY ED and everyone else too,Phil.

=====

Re:SPEED

Posted by gplant - 2008/09/23 11:44

Alls good now! COOL!

=====

Re:SPEED

Posted by Phil Abrahams - 2008/09/23 12:06

Yes now all is perfect i worked through the night to ensure everything is all ready now.I ended up drilling out the broken bolt and it was like a precision operation taking great care not to damage any thread's and did it with an extractor. So no

worrie's now as i took my time to get it all just right,talk about bad timing he he i can laugh:silly:now thank God,Phil.

=====

Re:SPEED

Posted by Phil Abrahams - 2008/09/25 01:58

Good design come straight from the heart to the hand's.using computer's you simply cannot do this thats why i only design everything by soul power on paper by hand.The human brain is a billion times more sophisticated than any computer will ever be in a billion years even from now so i rest my case.See ya all so soon now be good and god bless ya all,lol.Phil.

=====
